

Ready to use phenylalanine-free drink, supplemented with long-chain fatty acids, vitamins, and minerals, indicated for dietary treatment of hyperphenylalaninemia, including newborn phenylketonuria, from birth to the first year of age.

» **INDICATIONS** For dietary treatment of newborns suffering from hyperphenylalaninemia including phenylketonuria, from birth up to 12 months of age, or as supplement beyond one year of age.

» **DOSAGE AND ADMINISTRATION** According to the physician's prescription, taking into account age, body weight, clinical condition and nutritional needs of the subject.

» **INSTRUCTIONS FOR USE** Shake the bottle well. Pour the required amount of food product into the baby bottle, heat in a water bath or a microwave oven to the desired temperature (37°C), and administer. After use, close the bottle well. Refrigerate and use within the second day. The product is ready for use and should not be further diluted, unless specifically indicated by a pediatrician.

» **STORAGE CONDITIONS** Store the product in a dry place at a temperature between 8°C and 25°C, away from light and sources of direct heat. The expiry date refers to the product in an unopened, correctly stored package.

» **IMPORTANT WARNINGS** Afenil® Uno must only be taken under medical supervision by individuals with known hyperphenylalaninemia including phenylketonuria. Afenil® Uno can be used as the sole food source. The product can result in health risks if consumed by individuals who do not have the specific disorder for which it is indicated. Keep out of the reach of children. Do not use by parenteral administration.
