PROTEIN SUBSTITUTES FOR PKU

PHE-free protein substitutes for dietary management of **HYPERPHENYLALANEMIA**, including **PHENYLKETONURIA**

FOOD FOR SPECIAL MEDICAL PURPOSES

Afenil 1

 Ready to feed PHE free infant formula with vitamins, minerals and LCP fatty acids
From birth

-  500 ml bottle
- 200 ml bottle (6x200 ml)

Afenil 2

 PHE-free protein substitute in powder. From birth

-  500 g tin

Afenil Gel

 PHE free protein substitute in powder. From 6 months of age

-  30 sachets x 24 g

Afenil Medi 15

 PHE free protein substitute in powder
From 3 years of age

-  30 sachets x 25 g
- Unflavored, Orange or Berries

PROTEIN SUBSTITUTES FOR PKU

PHE-free protein substitutes for dietary management of **HYPERPHENYLALANEMIA**, including **PHENYLKETONURIA**

FOOD FOR SPECIAL MEDICAL PURPOSES

Afenil Squash 15

 Ready to use PHE free protein substitute
From 3 years of age

-  30 pouches x 130 ml
- Berries or Orange

Afenil Micro 3H

 PHE free protein substitute
in slow-release microtabs
From 3 years of age

-  4 tins x 110 g

Neutrafenil Micro R

 Large Neutral Amino Acids (LNAA)
mix in slow-release microtabs with arginine
and lysine. From 3 years of age

-  4 tins x 110 g

Afenil Buddy

 PHE free protein substitute in
powder. From 3 years of age

-  30 sachets x 22 g

PROTEIN SUBSTITUTES FOR PKU

PHE-free protein substitutes for dietary management of **HYPERPHENYLALANEMIA**, including **PHENYLKETONURIA**

FOOD FOR SPECIAL MEDICAL PURPOSES

Afenil Lime

 Ready to use PHE free protein substitute
From 3 years of age

 30 sachets x 14 g

Afenil GMP UP Bars

 Low-phenylalanine protein substitute with Glycomacropeptide (GMP) isolated from casein. From 3 years of age

 30 bars x 60 g Coconut
30 bars x 50 g Cream-mou

Afenil GMP UP Shake

 Low-phenylalanine protein substitute with Glycomacropeptide (GMP) isolated from casein. From 3 years of age

 30 sachets x 25 g
Milk or Orange

L-Tyrosina

 **FOOD SUPPLEMENT**

 30 caps 500 mg

PROTEIN SUBSTITUTES FOR NON PKU

Protein substitutes for dietary management of **NON-PKU DISEASES**

FOOD FOR SPECIAL MEDICAL PURPOSES

Medi 2

Protein substitutes for dietary management of aminoacidopathies, organic acidurias and urea cycle disorders.

FOR THE DIETARY MANAGEMENT OF:

Glutaric Aciduria type 1 (GA medi 2)

Homocystinuria (HOM medi 2)

Isovaleric Aciduria (IVA medi 2)

Leucinosi (MSUD medi 2)

Methylmalonic / Propionic Aciduria (MMA/PA medi 2)

Tyrosinemia type 1 (TYR medi 2)

Urea Cycle Disorders (UCD medi 2)

From 1 year of age

- 200 g tin
- Mix in powder

PROTEIN SUBSTITUTES FOR NON PKU

Protein substitutes for dietary management of **NON-PKU DISEASES**

FOOD FOR SPECIAL MEDICAL PURPOSES

Medigel

Protein substitutes with vitamins, minerals, selenium, taurine and carnitine, indicated for the dietary management of aminoacidopathies, organic acidurias and urea cycle disorders.

FOR THE DIETARY MANAGEMENT OF:

- Glutaric Aciduria type 1 (GA medigel)
- Homocystinuria (HOM medigel)
- Isovaleric Aciduria (IVA medigel)
- Leucinosi (MSUD medigel)
- Methylmalonic / Propionic Aciduria (MMA/PA medigel)
- Tyrosinemia (TYR medigel)
- Urea Cycle Disorders (UCD medigel)

From 6 months of age

30 sachets x 24 g powder

PROTEIN SUBSTITUTES FOR NON PKU

Protein substitutes for dietary management of **NON-PKU DISEASES**

FOOD FOR SPECIAL MEDICAL PURPOSES

Medi 15

Protein substitutes with vitamins, minerals, selenium, taurine and carnitine for the dietary management of aminoacidopathies, organic acidurias and urea cycle disorders.

FOR THE DIETARY MANAGEMENT OF:

Glutaric Aciduria type 1 (GA medi 15)

Homocystinuria (HOM medi 15)

Isovaleric Aciduria (IVA medi 15)

Leucinosis (MSUD medi 15)

Methylmalonic / Propionic Aciduria (MMA/PA medi 15)

Tyrosinemia (TYR medi 15)

Urea Cycle Disorders (UCD medi 15)

From 3 years of age

▪ 30 sachets x 25 g powder

PROTEIN SUBSTITUTES FOR NON PKU

Protein substitutes for dietary management of **NON-PKU DISEASES**

FOOD FOR SPECIAL MEDICAL PURPOSES

Medimicro 3H

Slow-release protein substitutes in microtabs for the dietary management of aminoacidopathies, organic acidurias and urea cycle disorders.

FOR THE DIETARY MANAGEMENT OF:

Glutaric Aciduria type 1 (GA medimicro 3H)

Homocystinuria (HOM medimicro 3H)

Isovaleric Aciduria (IVA medimicro 3H)

Leucinosis (MSUD medimicro 3H)

Methylmalonic / Propionic Aciduria (MMA/PA medimicro 3H)

Tyrosinemia (TYR medimicro 3H)

Urea Cycle Disorders (UCD medimicro 3H)

From 3 years of age

- 4 bottles x 110 g
- Slow-release microtablets

SLOW-RELEASE
TECHNOLOGY

LOW-PROTEIN FOOD

For the dietary management of low-protein diet, in: **CHRONIC KIDNEY FAILURE, INBORN ERRORS OF METABOLISM | PARKINSON | CELIAC** (Sineamin only)

FOOD FOR SPECIAL MEDICAL PURPOSES

Sineamin

 Protein and gluten free pasta

-  12 shapes
- Box 250/500 g

Milco

 Protein free milk

-  500 ml plastic bottle
- 200 ml plastic bottle (6x200 ml)
- Ciock flavoured 200 ml bottle (6x200 ml)
- Cappuccino flavoured 200 ml bottle (6x200 ml)

NEC

 Protein free and high energy powder (fatty acid and maltodextrin mix)

-  400 g tin

DIETARY OIL

For the dietary management of: **Fatty acid oxidation disorders | CYSTIC FIBROSIS**
Any situation in which ready high energy in low volume from fat is required

FOOD FOR SPECIAL MEDICAL PURPOSES

MCT Oil

Medium Chain Triglycerides Oil

- 240 ml bottle
- 1000 ml bottle
- 30 sachets x 10 ml

Chiloil

Medium Chain Triglycerides Oil fortified with selenium and vitamins A, D₃ and E

- 30x10 ml sachets

SPECIAL PEDIATRIC PRODUCTS

For dietary management of specific needs.

FOOD FOR SPECIAL MEDICAL PURPOSES

Medigel

 Thickener / gelling powder for dysphagia / anti-reflux in newborn

 ▪ 100 g tin

Rubrojunior

FOOD SUPPLEMENT

 Group B vitamins, lactoferrin and zinc supplement; in any situation in which supplementation of this nutrients is required

 ▪ 7 vials

FOOD FOR SPECIAL MEDICAL PURPOSES

DHA Medi Oil

 DHA for dietary management of cystic fibrosis or amino acid metabolism disorders (e.g. PKU)

 ▪ 30 ml bottle

FOOD SUPPLEMENT

D₃HA Oil

 DHA and vitamin D₃

 ▪ 30 ml bottle
